

Flexible tube Ø100 x L 650 mm

01206

February 25

Tube with flexible diameter Ø50-100 mm. Length 480-650 mm

Flexible tube with adjustable diameter 75-125 mm. Length: 480-650 mm. Suitable as an adaptation tube for connection to gutters, transition between different pipes, ventilation and aeration, mid-pipe repairs, or for guiding pipes past obstacles or height differences in trenches and terrain. The flexible construction provides a bending radius of 3 x diameter, allowing it to be easily routed around obstacles while maintaining an adjustable diameter. The tube functions as a coupling sleeve when connected to other pipes and tightened. No hose clamps or additional fasteners are required. It can be used as a bend or a transition between two pipes of different diameters. The pipe is extendable. Made of environmentally friendly PP. Temperature range: -30 °C to +80 °C. Color: Black

- Flexible and bendable tube
- Multiple applications
- Well-suited for directing water from gutte
- Adjustable diameter from Ø75-125 mm
- Extendable length from 480-650 mm

Art.no	01206
GTIN	7023670012060

Length (mm)	480 - 650
Weight (kg)	0.39
Color	Black
Material	PP/SEBS
