

# Flexit GO

## Control system with accessories

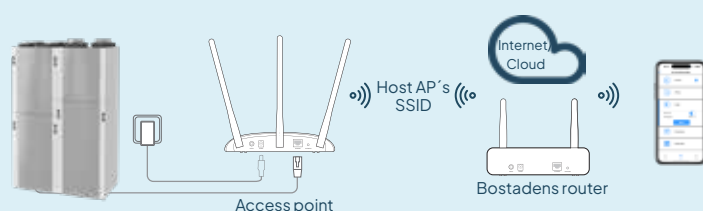

### Smart control with Flexit GO

EcoNordic and Nordic series are easily controlled with an app via smartphone or tablet, and no additional accessories are necessary to control the units.

### Easy connection

Connecting the unit is easy directly from your mobile phone, without any additional accessories. This requires internet access when connecting.

Your own access point can be used for wireless communication between the home's router and the air handling unit.

## Remote service

Flexit GO enables remote supervision and service from Flexit or other service personnel.

## Wireless accessories for demand-controlled ventilation

### Adapter – CI75

The device connects wireless accessories to the air handling unit.

### CO2 sensor – CI76

CI76 communicates information about CO2 levels and changes the speed steplessly as needed. Via the LED indicators and the push button you can read and set the desired fan mode for the air handling unit.

### Control panel – CI78

With the CI78 control panel you can:

- Easily activate home or away mode
- Increase the air volume to high
- Activate extra supply air when lighting the fireplace

### Humidity sensor – CI77

CI77 is a wireless humidity sensor. It provides information about the humidity level and changes the fan speed steplessly as needed. Via the LED indicators and the push button, you can read and set the desired fan mode for the ventilation unit.

### Pressure switch – CI79

CI79 is a pressure switch that gives the air handling unit a signal to increase the supply air when the kitchen hood is used.
